

AIR Tested/Verified Headsets

The following headsets have been thoroughly tested by AIR for use in online testing. Headsets listed below are verified to work with all supported devices running Windows, OS X, Linux, iOS, Android, and Chrome OS. Students are **not** required to use a headset from this list. Although these are the only headphones verified by AIR, most generic headphones are compatible with systems used for online testing. For more information, please consult the *System Requirements for Online Testing* on the South Dakota Portal.
